

## CUTTING EDGE TECHNOLOGY IN DOG TRACKING SYSTEM

**TRACKER**<sup>®</sup>  
TEAM UP STAY UP

Tracker is the world pioneer company in mobile positioning systems for hunting /sport dogs and semi domiciled animal like reindeers, goats, etc.

A technology made by **HUNTERS FOR HUNTERS**

**Mission:** A strong will to make hunting a social and loved experience for more people

**Promise:** To offer the best hunting experience and never loose contact.

**Tracker system consists of :**

GPS tracking collars for hunting dogs:, **G1000 MAXIMA, Tracker SUPRA, Tracker Artemis**

GPS tracking for domiciled and semi domiciled animal: **TRACKER SUPER BOAZU**

Cloud server : **Tracker live**

A software running solution: **Tracker Hunter 6**

- Compatible with Android / iOS
- Accurate positioning on high-quality maps:
- Multi-features dog tracking service
- Effective communication within a team
- Intuitive and easy to use interface
- Available for download via Google Play / App Store

**Well-fitted for all dog breeds**

# TRACKER ARTEMIS – future-proof 4G (LTE) based networks

« **STAY AHDEAD** » The new Tracker Artemis designed and developed with new and proven technology. Besides its full support for GSM networks, it operates with new future-proof 4G (LTE) based networks NB-IoT and LTE-CAT M1.

Tracker Artemis guarantee a seamless future technological transition, once the IoT networks replace 2G & 3G networks making Tracker Artemis a smart choice for present and the future.

## What's new:

- Operates with 4G (LTE) based networks NB-IoT and LTE-CAT M1
- Full support for 2G as a back up
- Automatic Over-The-Air software update
- New and accurate barking counter
- Bright LED-lights that can be controlled remotely
- super antenna design for excellent coverage
- Integrated antenna as an extra value
- Ergonomic for the dog with soft edges
- Changeable reflective collar

# TRACKER SUPRA

The new **SUPRA antenna solution** ensures superior network coverage even in the most challenging conditions. New robust design, durable covers, and the best choice of materials are carefully selected to resist extreme weather conditions. In the laboratory power tests (Radiated Performance Test, NRPHP + -30 °) Supra had about 2,5 times more power than earlier products.

## Main Features:

- Unlimited distance
- Real-time tracking every 3 seconds
- Automatic background tracking every 1 minute
- Automatic positioning on a terrain map with adjustable technology via GPRS / 3G
- Possibility to call the dog and listen to the surrounding noise
- No radio frequency interference or ID confusion

# Tracker G1000 MAXIMAL

**TRACKER G1000, the First 3G GPS Collar for Dogs in the world!**

## Tracking features:

- Unlimited tracking distance
- Real time tracking every 3 seconds
- Automatic background tracking every 1 min
- Possibility to call the dog and listen to surrounding noise
- Accurate barking indicator displayed

## Technical characteristics:

- Super strong GSM reception by 900 MHz optimized GSM antenna for reliable transmitting of the dog's position even in challenging areas
- **It runs and runs** battery life is up to 50% better than the well-known G400 model.
- **Audio commands** "No" and "Here" for training the dog
- Remote software update for **new features** via the mobile data over-the-air

## Super Boazu : A tracking solution for domestic & semi-domesticated animals

Tracker Super BOAZU, a GPS based positioning system aimed for herd tracking like reindeers in Nordic regions or other livestock tracking like goats, sheep, cows etc..

It shows animals' position and direction precisely and reliably with very long battery life (over 300 days). With Tracker Boazu, you can easily follow your livestock movements on the map via a mobile phone, or a computer on web navigator Web Tracking"

Super Tracker Boazu has a long battery life more than 300 days. the battery is self-replaceable with a very durable and resistant fiberglass case that lasts for years even in difficult areas or with the effect of scraping stones, branches, hooves, etc.

### Added value

- Easy and effortless tracking of herds' location and movements
- Save fuel
- Minimize animal accidents in traffic
- Animal death detection in the surrounding area in case of a predatory attack like
- All data information is protected and saved for unlimited period

### Easy maintenance and use:

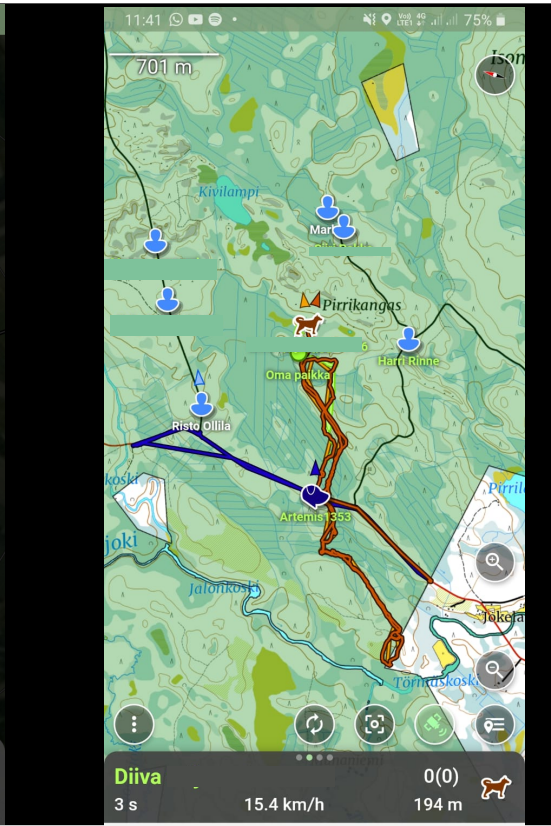

- Replace battery, collar or SIM card yourself in the woods
- The customer support for proper use of the device and maintenance

# THE EASIEST AND MOST RELIABLE CONNECTION WITHIN A HUNTING TEAM

Management. communication. Security

# Tracker Live™, a cloud solution that precisely meets your requirements

Tracker service is the **all-inclusive tracking and navigation solution** for hunters, and hunting clubs.

you can track and trace in **real time** an **unlimited number** of dogs or team members, follow the hunting actions in the field and **communicate between groups**.

Tracker service gives you access to **high quality terrain maps** for a smart and easy navigation.

The unique **replay feature**: smart way to analyze your hunting actions, dogs' performances /behavior minute by minute.

“There is nothing better than hunting together! »

Tracker Group is an inevitable means of communication for hunting teams. It facilitates coordination and exchange of information in real time within the group. Any changes waypoints, targets, lines stands etc. are instantly shared with other hunters in the field.

- Marking and managing waypoints "Meeting point", "car", "shooter's stands", etc. with possibility to share with your friends
- Real-time tracking of dogs/friends every 3 seconds .
- All changes are automatically updated to all team members of the group.
- A smart solution to better manage your actions and minimize the risk of accidents
